

PT-1 Polarity Tester

The PT-1 provides a simple and easy way to determine the relative polarity of bobbin coil windings. By placing a coil on the platform and making connection to the start and end of a winding, a test signal is induced in the winding. Depending on the direction of the winding, a Red / Green LED will indicate the relative polarity. The induced signal is very low level and completely safe to the operator.

SPECIFICATIONS

Sensitivity to 1 turn winding:
.5" (12 mm) diameter, .2" (5 mm)
above platform
3" (8 cm) diameter, 1.5" (4 cm) above

Dimensions: 4" (10 cm) x 4" (10 cm) x
1 1/2" (4 cm)
Power Supply: 120 VAC 15 watt; 220
VAC 8 watt
Operating Voltage: 12 V DC @ 250 mA
(3 W)

FEATURES

- High Sensitivity
- Quick Response
- Easy to Use
- Accepts a wide range of coil sizes
- Useful for verifying correct coil terminations.
